Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) An electronic text and/or graphics presentation device including:

receiving means for receiving a card having a pattern encoding text and/or graphics of ~~an entire document~~ a plurality of pages of a document printed thereon, the receiving means incorporating a roller mechanism arranged to retract the card into the device;

scanning means arranged to scan the printed pattern as the card is retracted into the device by the roller mechanism;

user input control means;

processing means coupled to the scanning means, the programming means operatively programmed to generate a data signal corresponding to the text and/or graphics in response to a control signal from the user input control means; and

display means arranged to receive the data signal from the processing means and display the text and/or graphics as a corresponding plurality of digital pages.

2. (Original) An electronic text and/or graphics presentation device according to claim 1 including a foldable housing comprising first and second housing portions pivotal relative to each other.

3. (Original) An electronic text and/or graphics presentation device according to claim 2, wherein the first and second housing portions are each pivotally connected to a common spine.

4. (Original) An electronic text and/or graphics presentation device according to claim 3, wherein the spine includes a battery compartment.

5-6. Cancelled

7. (Currently amended) An electronic text and/or graphics presentation device according to claim 2, wherein the roller mechanism is incorporated into the first housing portion.

8. (Original) An electronic text and/or graphics presentation device according to claim 7, wherein the first housing portion includes a window for observing a card retracted into the first portion.

9. (Previously presented) An electronic text and/or graphics presentation device according to claim 1, further including a card storage magazine.

10. (Previously presented) An electronic text and/or graphics presentation device according to claim 2, further including a card storage magazine formed in the second housing portion.

11. (Original) An electronic text and/or graphics presentation device according to claim 2, wherein the display means comprises a flexible LCD screen located across inner surfaces of the first and second housing portions.

12. (Original) An electronic text and/or graphics presentation device according to claim 11, wherein the flexible LCD screen is bi-stable.

13. (Original) An electronic text and/or graphics presentation device according to claim 3, including a recess for receiving a loop of a flexible LCD screen upon pivoting the first and second housing portions to a closed position in order that creasing of the LCD screen is avoided.

14. (Original) An electronic text and/or graphics presentation device according to claim 2 wherein first and second printed circuit boards are located in the first and second housing portions respectively.

15. (Original) An electronic text and/or graphics presentation device according to claim 14, wherein the flexible LCD screen may include conductive traces coupling the first and second printed circuit boards to each other.

4

16. (Original) An electronic text and/or graphics presentation device according to claim 1, wherein the user input control means comprises a joystick assembly.

17. (Currently amended) An electronic text and/or graphics presentation device including:

a housing having a slot for receiving a card having a pattern encoding text and/or graphics of ~~an entire document~~ a plurality of pages of a document printed thereon;

a roller mechanism arranged to retract the card into the device through the slot;

a scan head arranged to scan the printed pattern as the card is retracted into the device by the roller mechanism;

a processor coupled to the scan head and configured to generate data corresponding to the text and/or graphics; and

a display screen arranged to receive the data from the processor and display the text and/or graphics as a corresponding plurality of digital pages.

18. Cancelled
